Goal	Obie	ective	Management Tools	Difficulty	2009 Oct-Dec	Jan-Mar	10 Jul-Sep	Oct-Dec	Jan-Mar	20 Apr-Jun	11 Jul-Sep Oct-Dec	Jan-Mar		)12 Jul-Sep	Oct-Dec	Jan-Mar	 013 Jul-Sep
1			Agree on the process that NIWC TACs and management measures are reviewed	Medium									-				
1			Develop a process to manage urgent issues	Medium													
_																	 
1	E		Review the fishing methods used on the NIWC and characterise fishing practices e.g. set nets	Easy													 
1	E		Improve education on fish handling and best practices	Medium													 
1	(	С	Improve reporting requirements of wastage, juvenile mortality and bycatch	Hard													 
1	(		Apply the harvest strategy standard to NIWC stocks Review sector catch estimates for NIWC stocks and identify information requirements for priority	Med/Hard													
1	(		stocks	Med/Hard			 										 
1	(	с	Identify impacts of localised depletion on overall stock sustainability	Hard			 										 
1	(	с	Review current management areas and determine if they are set appropriately	Hard													
1		D	Identify and gather appropriately detailed and geographically scaled information for all sectors	Hard													 
1	C	ט ט	Value anecotal, matauranga maori and kaltiaki information and determine how this can be effective used in fisheries management	Medium													
1			Agree on a process to gather information when it is urgently needed ie responding to immediate issues	Med/Hard													
1	[	D	Ensure that scientific research carried out is relevant and cost effective	Medium													
2	A		Agree on an improved decision making process to involve tangata whenua, communities and stakeholders	Hard													
2	E	в	Improve networks and identify local and regional user groups														
2	F		Local fisheries plans are developed to manage local fisheries and achieve relevant objectives of this Fish Plan e.g. rohe moana plans and harbour plans	Easy													
2			Notify relevant government authorities on the need to contact and relevant tangata whenua for														
			particular issues. MFish raises awareness with all the relevant government authorities about this plan and their	Easy													 
2	(		responsibilities to acknowledge or accommodate the plan within their decision making processes The NIWC Advisory Group group actively shares information and participates in non-fisheries	Easy													 
2	(	C	processes that impact on the NIWC finfish fisheries	Easy													 
3	4	A	Improve education about fisheries management frameworks for each sector	Medium													 
3	A	A	Increase communication between sectors about the values they obtain from fishing	Medium			 										 
3	E	В	Improve education and matauranga within industry and communities e.g. schools, clubs, marae	Medium													 
3	E		Improve signage at boat ramps and fishing spots Improve relationships between Fishery Officers, Honorary Fisheries Officers, Tangata Kaitiaki and	Easy													
3	E	В	local communities to better use compliance resources Improve the use of media e.g. TV shows, pamphlets, internet and notifying of offenders and their	Medium			 										 
3	E		offences in local newspapers	Medium													
3	(	с	Address fisher concerns about spatial overlap	Hard													 
3	(	с	Address fisher concerns about inequality of access	Hard													
3		D	Improved collection of harvest information from all sectors	Hard													
3		D	Use sector harvest information to better inform the allocation of TACS	Medium													
3	E		Review regulations to ensure they are achieving the desired objective, enforceable, cost effective an easy to understand	d Medium													
3	E	E	Ensure that the penalties reflect the impacts of non-compliance on fish stocks	Medium													
3		F	Improve education of sector's different fishing rights	Medium													
3		F	Provide incentives for all sectors to participate in managing their fisheries	Hard													
4	-		Characterise the effects of fishing on NIWC species and habitats	Hard													
4			Improve our understanding of how species interact with each other	Hard													
4			Identify habitats of particular importance for fisheries management	Medium													
4	E		Identify activities that occur in coastal areas and the marine environment and can affect fisheries	Easy													 
4	E		Improve working relationships with agencies responsible for managing those marine activities Document the fishing methods used on the NIWC and characterise impacts on the environment (e.g.	Medium													 
4	(		effects of lost fishing gear)	Easy													
4	(	С	Educate fishers on practices that minimise the impacts on the environment.	Medium													 
4	(	с	Encourage innovation within the commercial sector to improve best practice	Medium													
4			Promote a coordinated approach to the management of the NIWC environment amongst sectors. Identify the impacts of land-based activities (including climate change) on the NIWC marine	Easy													
4	E	E	environment.	Medium													
4			Identify and promote the fisheries benefits of mitigation methods such as riparian planting and fenci Work together with relevant agencies to ensure current rules and regulations are effective in preventing sedimentation, nitrification and other processes that can be shown to adversely impact marine habitats.	Medium Hard
